

\*\*\* Lakeside Medical Center - Physician's Encounter Note \*\*\*

PATIENT: Jane Smith (DOB: 1990-07-15) PAYER: HealthFirst Insurance DATE OF SERVICE: 2024-06-25

--- CLINICAL NOTES ---

SUBJECTIVE: Patient, a 34-year-old female, presents to the clinic today after a fall from a set of stairs at home. She reports immediate, severe pain and swelling in her right ankle. Unable to bear weight.

OBJECTIVE: Examination reveals significant edema and ecchymosis around the lateral malleolus of the right ankle. Palpation elicits exquisite tenderness. No open wounds.

ASSESSMENT & PLAN:

1. Acute right ankle pain, suspected distal fibular fracture.
2. Plan: Order a three-view X-ray of the right ankle to rule out fracture. Patient was seen for a moderately complex evaluation and management visit. Will follow up after imaging results are reviewed.
