Subjective:

Chief Complaints:

1. 6 MONTH FOLLOW UP.

HPI:

General:

Patient is an 86-year-old female who presents with several ongoing health concerns. She reports mild cognitive impairment, which has been managed with Donepezil since December 2024. Jerlene initially tried Memantine, but it caused facial twitching, leading to its discontinuation. She has experienced dizziness and balance issues, prompting physical therapy sessions in December and January. Jerry also reports low back pain and leg pain, for which Gabapentin was prescribed. She feels her left hand is swollen and painful, especially when weight is applied, following carpal tunnel surgery last year. Jerry suspects arthritis might be contributing to her hand discomfort. She is considering revisiting her hand specialist, Doctor Biggers, for further evaluation and potential steroid injection. She manages her diabetes with Farxiga and an injectable medication, noting her A1C was 7.7 recently. She also takes Allopurinol for gout and Amlodipine for hypertension. Jerry's kidney function is monitored due to chronic kidney disease, with a creatinine level of 1.8 noted in October. She expresses concern about her back pain, which has worsened recently, affecting her ability to perform exercises.

Medical History: HIGH BP, Diabetes, Anemia (followed by hematology at West).

Family History: No Family History documented..

Social History: Smoking Are you a: nonsmoker. Alcohol Screen Did you have a drink containing alcohol in the past year? No, Points 0, Interpretation Negative. Caffeine: 1-2 cups per day.

Medications: Taking donepezil 10 mg tablet 1 tab(s) orally once a day (at bedtime) , Taking olmesartan 5 mg tablet 2 tab(s) orally once a day , Taking Farxiga 5 mg tablet 1 tab(s) orally once a day , Taking furosemide 40 mg tablet 1 tab(s) orally once a day , Taking aspirin 81 mg delayed release tablet 1 tab(s) orally once a day , Taking atorvastatin 40 mg tablet 1 tab(s) orally once a day , Taking gabapentin 100 mg capsule 1 cap(s) orally 3 times a day as needed , Taking allopurinol 100 mg tablet , Taking AmLODIPine Besylate 10 mg tablet 1 tab(s) orally once a day , Discontinued Januvia 25 mg tablet 1 tab(s) orally once a day , Medication List reviewed and reconciled with the patient

Allergies: N.K.D.A.

Objective:

Vitals:

Height: 62 in, Wt: 167 lbs, BMI: **30.54**, BP sitting: **148/76**, Pulse sitting: 98.

Pt extremely wobbly while walking today. She stumbled into the chair.

Examination:

Neurological:

Cortical functions: alert and oriented X 3, general knowledge and judgement within normal limits, language is intact with no aphasia, visual fields intact in all four quadrants

she is ori to mo, +dow, -dom, floor. Cranial Nerves: II - Pupils reactive, no afferent pupil defect, optic discs flat;

III , IV, VI - EOM were full with normal pursuit and saccade, No ptosis or nystagmus;

V - Motor V intact, Pinprick, light touch intact in all three divisions;

VII - No asymmetry or weakness;

IX , X- Palate elevates symmetrically;
